

# 2025 BILLING GUIDE

for Hospital Outpatient Departments (HOPD)

**TriNav Infusion Systems:** TriNav®, TriNav FLX and TriNav LV. TriNav Infusion Systems use the SmartValve technology to enable the PEDD™ approach.

## 2025 CODING INFORMATION FOR HOSPITAL OUTPATIENT DEPARTMENTS

January 1, 2024, the Centers for Medicare & Medicaid Services (CMS) created a New Technology Healthcare Common Procedure Coding System (HCPCS) procedure code (C9797) for hospital outpatient departments to report procedures involving the TriNav and TriNav LV Infusion Systems.<sup>1</sup>

April 1, 2025, the Centers for Medicare & Medicaid Services (CMS) issued a New Technology Healthcare Common Procedure Coding System (HCPCS) procedure code (C8004) for hospital outpatient departments and to report “simulation angiogram” procedures (commonly referred to as a mapping procedure), utilizing the TriNav Infusion Systems.<sup>2</sup>

### TRINAV INFUSION SYSTEMS PROCEDURE CODES

Hospital outpatient departments (HOPDs) should report C8004 for simulation procedures and C9797 for therapeutic procedures that utilize the TriNav Infusion Systems. HOPDs should no longer bill 37242 or 37243 for procedures that utilize the TriNav Infusion Systems.

| HCPCS Code   | Description  |
|--------------|--|
| <b>C8004</b> | Simulation angiogram with use of a pressure-generating catheter (e.g., one-way valve, intermittently occluding), inclusive of all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the angiogram, for subsequent therapeutic radioembolization of tumors               |
| <b>C9797</b> | Vascular embolization or occlusion procedure with use of a pressure-generating catheter (e.g., one-way valve, intermittently occluding), inclusive of all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the intervention; for tumors, organ ischemia, or infarction |

### TRINAV INFUSION SYSTEMS DEVICE CODE

For Medicare claims, HOPDs are required to report C1982 for the TriNav Infusion Systems devices. HOPDs may have an existing contractual arrangement with payers that allows or requires them to separately bill devices. HOPDs are encouraged to contact their commercial payers to verify their requirements for reporting C1982.

| HCPCS Code   | Description  |
|--------------|--|
| <b>C1982</b> | Catheter, pressure-generating, one-way valve, intermittently occlusive |

### 2025 MEDICARE AMBULATORY PAYMENT CLASSIFICATION (APC) HOPD ASSIGNMENT

**C9797 is assigned to (APC) 5194 Level 4 Endovascular Procedures.**

**C8004 is assigned to (APC) 5193 Level 3 Endovascular Procedures.**

For Medicare claims, payment for the device reported as C1982 is packaged into the APC payment for the procedure. Commercial payers may pay separately for the device, depending on individual hospital contracts with the payer.

| APC         | Description                     | 2025 APC Payment <sup>3</sup> | Status Indicator |
|-------------|---------------------------------|-------------------------------|------------------|
| <b>5193</b> | Level 3 Endovascular Procedures | \$11,340.57                   | J1               |
| <b>5194</b> | Level 4 Endovascular Procedures | \$17,956.72                   | J1               |

## REVENUE CODES

When assigning a revenue code to HCPCS code C9797, C8004, C1982, hospitals should consider where procedures will be performed.

- HCPCS codes C9797 and C8004 are procedure codes.
- HCPCS code C1982 is a device code.

|            | Description   |
|------------|---|
| <b>335</b> | Radiology – Therapeutic and/or Chemotherapy Administration; Chemotherapy Admin – IV |
| <b>360</b> | Operating Room Services; General Classification                                     |
| <b>361</b> | Operating Room Services – Minor Surgery   |
| <b>272</b> | Medical/Surgical Supplies and Devices; Sterile Supplies                             |
| <b>278</b> | Medical/Surgical Supplies and Devices, Other Implants                               |

## FACILITY PLACE OF SERVICE (POS) CODES

| Place of Service Name and Code             | Place of Service Description  |
|--|---|
| <b>Off Campus-Outpatient Hospital (19)</b> | A portion of an off-campus hospital provider-based department which provides diagnostic, therapeutic (both surgical and nonsurgical), and rehabilitation services to sick or injured persons who do not require hospitalization or institutionalization |
| <b>On Campus-Outpatient Hospital (22)</b>  | A portion of a hospital's main campus which provides diagnostic, therapeutic (both surgical and nonsurgical), and rehabilitation services to sick or injured persons who do not require hospitalization or institutionalization                         |

**Indications for Use:** The TriNav, TriNav FLX, and TriNav LV Infusion Systems are intended for use in angiographic procedures. They deliver radiopaque media and therapeutic agents to selected sites in the peripheral vascular system.<sup>4,5,6</sup>

**Contraindications:** The TriNav, TriNav FLX, and TriNav LV Infusion Systems are not indicated for use in the vasculature of the central nervous system (including the neurovasculature) or central circulatory system (including the coronary vasculature).<sup>4,5,6</sup>

**Rx Only.** For the safe and proper use of the TriNav, TriNav FLX, and TriNav LV Infusion Systems, refer to their individual Instructions for Use.
